FIG. 28A is a cross-sectional view of a catheter assembly 10 in a curved configuration. The catheter assembly 10 includes a catheter body 12, a catheter tip 14, and a catheter handle 16. The catheter body 12 is shown in a curved configuration, with the catheter tip 14 at the distal end and the catheter handle 16 at the proximal end. The catheter body 12 is shown in a cross-sectional view, with the catheter tip 14 at the distal end and the catheter handle 16 at the proximal end. The catheter body 12 is shown in a cross-sectional view, with the catheter tip 14 at the distal end and the catheter handle 16 at the proximal end.

FIGURE 28A

FIG. 28C is a cross-sectional view of the catheter 71 taken along line 78-78 of FIG. 28B. The catheter 71 includes an outer sheath 72 and an inner tube 73. The inner tube 73 has a lumen 74. The catheter 71 is shown in a cross-sectional view, with the outer sheath 72 and inner tube 73 clearly defined. The lumen 74 is the central opening of the inner tube 73.

FIGURE 28C

FIG. 28E

FIG. 28F is a cross-sectional view of the device 100 in a second position, showing the device 100 in contact with the tissue 102. The device 100 is shown in a cross-sectional view, with the outer sheath 101 and the inner member 103. The inner member 103 is shown in a cross-sectional view, with the distal end 104 and the proximal end 105. The device 100 is shown in a cross-sectional view, with the outer sheath 101 and the inner member 103. The inner member 103 is shown in a cross-sectional view, with the distal end 104 and the proximal end 105.
